

## Agent Tinfoil: Litepaper

By Egregore Labs

*"We're not saying it's aliens, but the AI might."*

---

### 1. Introduction / Problem Statement

Agent Tinfoil is designed to address a growing fascination with the conspiracy-to-truth phenomenon on X threads, as we see more and more conspiracy theories actually turning out to be true.

With the vast sea of content on social media—where ratioed tweets, dark theories, and hidden truths abound—users need a fun, efficient way to:

- Surface popular, breaking conspiracy theories
- Participate in shaping these narratives
- Earn rewards for actively contributing to the conversation

Conventional social platforms often fail to capture the *value* of user engagement on such niche subjects. That's where **Agent Tinfoil** comes in—an **AI agent** that hunts down breaking conspiracy theories and brutally ratioed tweets by incentivizing contributors with a custom token, **\$TINFOIL**.

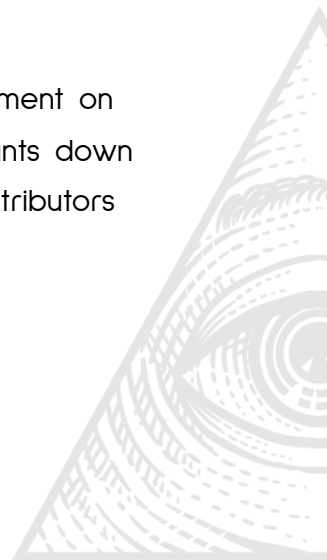

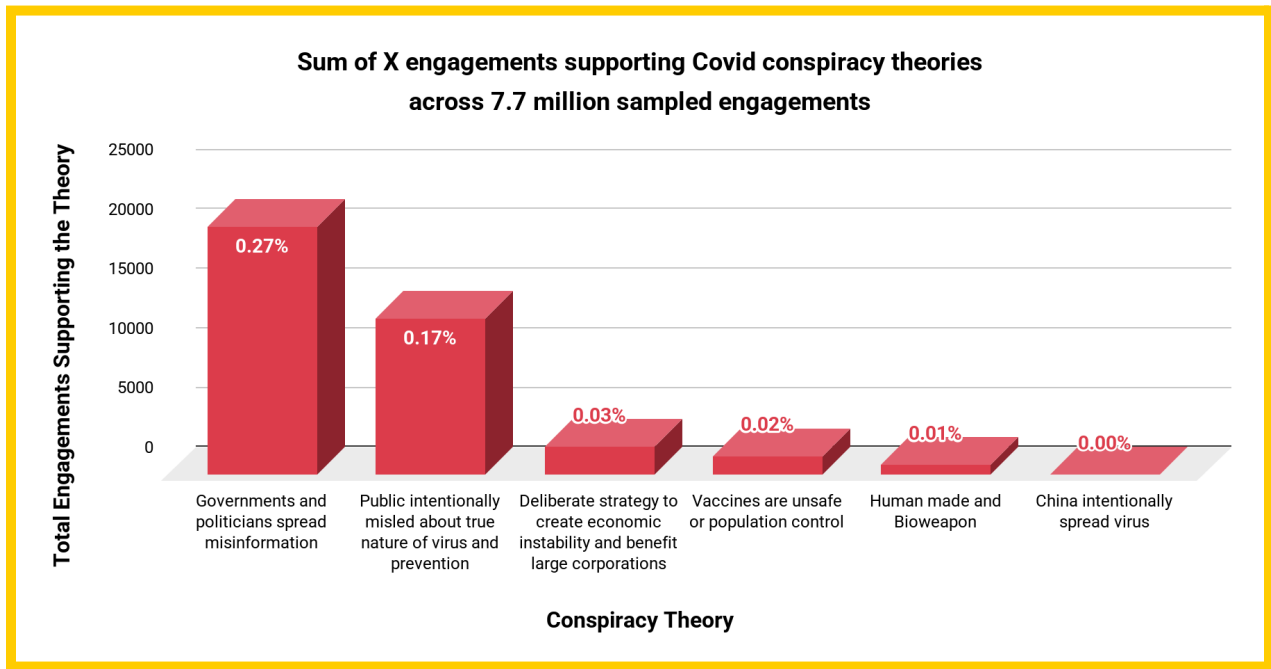

Fig. 1. Research from August 2024 in the US National Library of Medicine:

The bars represent the total number of engagements that support each conspiracy theory, while the percentages (%) above the bars indicate the proportion of these engagements relative to the total number of all engagements.

### Covid was the Catalyst.

A 99.97% survival rate virus caused mass-hysteria and a wholesale change in protocol. People all around the world were shocked with stay-at-home restrictions, social distancing and Mask policies. It took 3 years but we now know it was all anti-science. This in-turn made normal everyday people everywhere question "well if they lied about that, what else did they lie about?"

Covid triggered the start of the "Great Awakening" - The single largest trend in modern history. It did NOT help that during the same period of time various governments began to act tyrannical on numerous fronts.

Here is just 1 short list of debunked hoaxes which originated from Governments & Media:

*Fig. 2. Popular list of government/media originated PsyOps that have been debunked;*

How many recent mainstream media hoaxes did you fall for?

- Russian collusion
- The Inflation Reduction Act reduces inflation
- Trump called neo-nazis "fine people"
- Jussie Smollett
- Bubba Wallace garage pull
- Hunter Biden's laptop was Russian disinformation
- Covington kids
- Governor Witmer kidnapping plot
- Kavanaugh rape
- Trump said drinking bleach would fight COVID
- Russia bombed their own pipeline
- Trump pee tape
- COVID lab leak was a conspiracy theory
- Border agents whipped migrants
- Trump saved nuclear secrets at Mar-a-Lago
- Steele Dossier
- Russian bounties on US soldiers in Afghanistan
- Muslim travel ban
- Andrew Cuomo showed the best COVID leadership
- Ghost of Kyiv
- Trump built cages for migrant kids
- Austere religious scholar
- Trump overfed Koi fish in Japan
- Build Back Better will pay for itself
- Trump tax cuts benefited only the rich
- Cloth masks prevent COVID
- If you get vaccinated you won't catch COVID
- SUV killed parade marchers
- Trump used teargas to clear a crowd for a bible photo
- Don't Say Gay was in a bill
- Putin price hike
- Ivermectin is a horse dewormer and not for humans
- Mostly peaceful protests
- Trump overpowered secret service for wheel of "The Beast"
- Officer Sicknick was murdered by protesters
- January 6th was an insurrection
- Trump mocked a reporter's disability
- BYU students hurled racist insults at Duke volleyball player
- Rocket that hit Poland was launched by Russia

Every single one of these was made up. There were dozens more. The Establishment became the #1 source of actual misinformation while simultaneously gaslighting the public to believe real news was fake. Asymmetric information warfare.

## 2. Project Overview / Key Features

Developed by Egregore Labs, Agent Tinfoil has several key components:

### A. AI Agent “Tinfoil”

- **Role:** It scours X, responding when tagged by users on potentially “conspiratorial” or significantly ratioed threads.
- **Analysis & Reward Weighting:**
  1. **Time-based Weighting**
    - Early engagement on a newly emerging thread may yield higher \$TINFOIL rewards.
    - Rewards are scaled down as more users tag the same conspiracy, encouraging users to be first-movers on breaking conspiracies.
  2. **Quality Scoring**
    - The Agent uses sentiment analysis, keyword detection and topic frequency across multiple threads to measure the “quality” of tagged conspiracies.
    - High-quality conspiracies are scored internally based on criteria such as having highly detailed threads with multiple sources, strong engagement and multiple tagged sources.
  3. **User Influence Scoring**
    - The Agent assigns a score to each user based on follower count, historical engagement, and prior accuracy in spotting noteworthy conspiracies.
  4. **Identifying Breaking Conspiracy Trends**
    - The Agent monitors spikes in user tags and specific keywords to detect new and rapidly spreading conspiracies.

## B. Train to Earn

- **Purpose:** Rewards early contributors who "train" the Agent by tagging it in fresh conspiracy threads.
- **Mechanism:**
  - 5% of the total tokens are reserved for this short-term program.
  - Users who surface new, relevant conspiracies earn \$TINFOIL tokens, based on the Conspiracy quality, the User Influence Score and the timeline of reporting the conspiracy to the agent.

*Example: A new conspiracy trend was identified that "Kazakhstan has been secretly buying bitcoin for over a decade and is building nuclear powered attack drones to invade Uzbekistan within 60 days."*

- **Metrics:**
  - Thread value: 2.1M views, 841,380 engagements, Top 5% total engaged User Influence Scores 29,028 of 42,069; Thread Quality 69% which is above above a predetermined threshold
  - Tinfoil tags/mentions: 2,871
  - Total number of conspiracy threads on this topic above Thread Quality Threshold: 18
  - Conspiracy Quality: Total number of threads and total / average thread quality ranked against other reported Conspiracies
  - Reward reservation for the Conspiracy is determined by Conspiracy Quality, which is the percentage ranked across all trends verified by the agent.
  - Reward payout for the 2,871 engaged users is weighted by
    - Timeline, decreasing reward from first to last
    - User Influence Score, decreasing reward from highest to lowest
- **Payout:**
  - Reward tokens will be distributed via an Airdrop claim on an Egregore dashboard. The backend system will store all engagements and tags during the Airdrop period and after the snapshot date, the value of each claim will be calculated and tied to an X user profile. During the Airdrop claim period, the user will login to the portal with their X account, then process their claim.

## C. Proof of Troll

- **Purpose:** Encourages users to tag Agent Tinfoil in ratios that debunk or contest mainstream narratives with conspiracy facts.
- **Mechanism:**
  - 5% of tokens allocated for this long-running campaign.
  - Rewards users that tag Agent Tinfoil in their most brutal, or high value ratio comments. The value of the ratio will be based on overall thread quality and ratio value during specific timeframes.

*Example: A government official condemns a political party for their hard stance on non-violent crime, but gets ratioed by a user that tags Agent Tinfoil in a comment showing a news story of the government official being mugged in the subway just hours later.*

- **Metrics:**
  - Thread value: 1M views, 619,809 engagements, Top 5% total engaged User Influence Scores 22,313 of 30,990 - making Thread Quality 72%
  - Reward reservation for the Ratio is determined by Thread Quality percentage ranked across all reported ratios during the current payout period.
- **Payout:**
  - Reward tokens will be distributed via a claim on an Egregore dashboard. Each period will have a claim available for the user for that claim period, and will use the same system that is built for the Airdrop during the Training program. Existing claims will expire when the next claim payout period begins.

## D. Prediction Markets

- Purpose: Adds a gamified, financial layer to the conspiratorial discussion.
- Mechanism:
  - Agent Tinfoil can create prediction markets around time-bound or outcome-specific conspiracies (e.g., "Will Government X do Y by Date Z?")
  - Periodically, Tinfoil will publish polls on X to determine the most likely scenarios of a high quality conspiracy with time bound parameters. With enough user engagement on the polls and a financially viable spread on user votes, a Prediction Market will be created by the Agent for users to bet on.
  - The fees earned from the prediction markets will further drive the economics of the \$TINFOIL token, as described in the Tokenomics section.

## 3. Tokenomics (Short Version)

The \$TINFOIL token fuels the entire ecosystem:

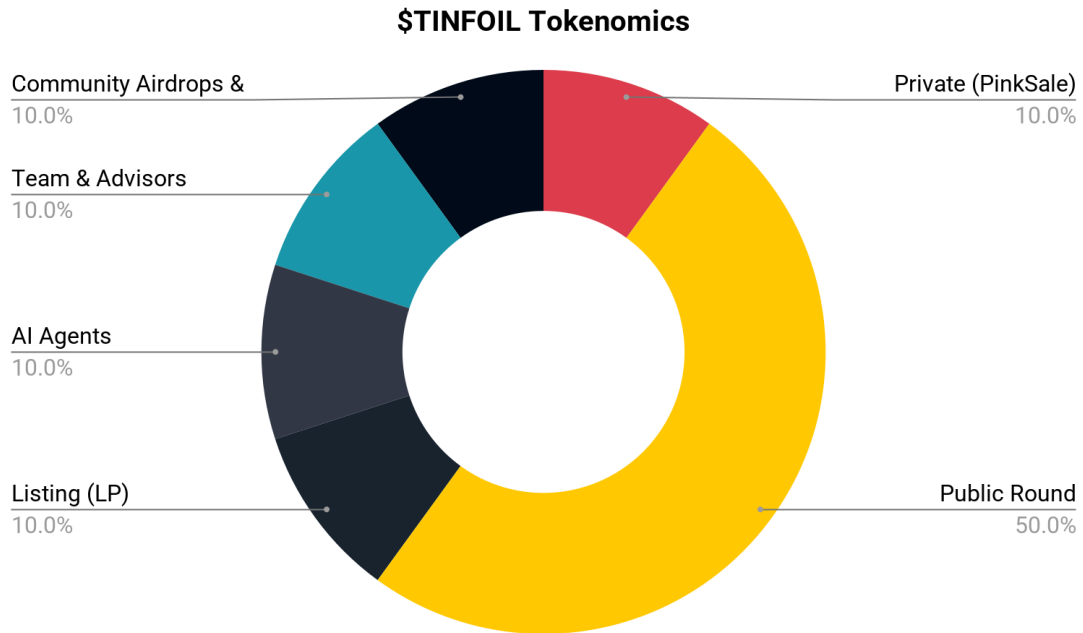

- Total Supply: 1,000,000,000 tokens

Distribution:

- 10% Private sale
- 50% Public sale
- 10% Listing (LP)
- 10% AI Agents Development
- 10% Team & Advisors (Egregore Labs)
- 10% Train to Earn & Proof of Troll

	Token Price (USD)	Token Amount	%	Round Value (USD)
Private (PinkSale)	0.005	100,000,000	10.00%	500,000
Public Round	0.010	500,000,000	50.00%	5,000,000
Listing (LP)	0.010	100,000,000	10.00%	1,000,000
AI Agents Development		100,000,000	10.00%	
Team & Advisors (Egregore Labs)		100,000,000	10.00%	
Community Airdrops & Marketing		100,000,000	10.00%	
<b>Total</b>		<b>1,000,000,000</b>	<b>100.00%</b>	

- **Use of Revenue:**
  - The Agent (Tinfoil) generates revenue primarily from:
    - Liquidity fees on Automated Market Makers (AMMs)
    - Fees from Prediction Market
  - **Revenue Allocation:** 50% buys back \$TINFOIL, 50% covers operating expenses.

## 4. Roadmap / Milestones

Below is a *tentative* timeline—subject to the whims of conspiratorial fate, of course:

### 1. Phase 1: AI Tinfoil Agent MVP

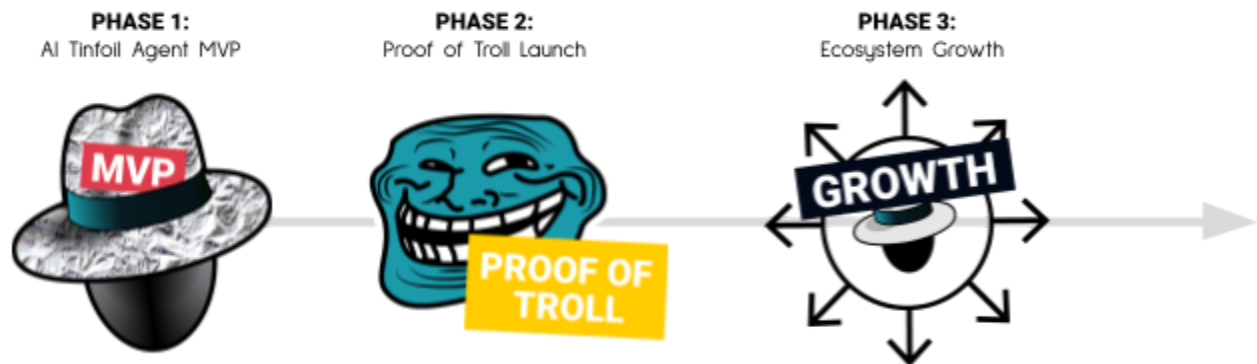

- Deploy the AI-driven X Agent.
- Initiate the “Train to Earn” program.

### 2. Phase 2: Proof of Troll Launch

- Expand Tinfoil Agent’s capabilities to identify ratioed targets in real time.
- Start the long-running “Proof of Troll” reward payouts.

### 3. Phase 3: Ecosystem Growth

- Optimize buyback mechanisms, enhance AI Agent user engagement, and refine conspiracy detection algorithms.

## 5. Team & Partners

Agent Tinfoil is spearheaded by Egregore Labs, a collective of blockchain engineers, AI specialists, and tinfoil hat enthusiasts.

With 10 years+ average experience in crypto, the team has connections to most industry exchanges, MM's, media, PR, Tech and other resources.

For very obvious reasons this team will stay Anon.

---

## 6. Call to Action

Join the Tinfoil Army and help shape the future of conspiratorial engagement! Whether you're tagging the next big ratioed tweet or simply collecting \$TINFOIL tokens for fun:

- Follow us on X: [Egregore\\_Ai](#) / [Agent Tinfoil](#)
- Join our Discord: [Egregore Discord](#)
- Dive deeper into the cause: [tinfoil.gg](#)

Your tinfoil hat is waiting.

---

## 7. Disclaimers

- This Litepaper provides a high-level overview and is subject to change.
- Nothing herein constitutes financial or investment advice.
- The success of Agent Tinfoil depends on community engagement and external factors beyond our control.
